

Can solar panels be moved

Overview

It's absolutely possible to move solar panels, but there are several considerations you have to make before, during and after the moving process. Can solar panels be moved?

Since they don't operate in your new neighborhood, you won't be able to have them move your solar panels. In that case, you'll either have to move the solar panels yourself or hire a third party to move them for you. Either way, your warranty will be voided, so it will probably make more sense to leave the panels in place.

What happens if you move solar panels outside your service area?

Things get more complicated when you move outside of your solar company's service area. Since they don't operate in your new neighborhood, you won't be able to have them move your solar panels. In that case, you'll either have to move the solar panels yourself or hire a third party to move them for you.

Can I move my solar system to a new home?

It's best to use the same company that originally installed your solar panels when moving your system to a new home. The experienced solar technicians from the company will know how to safely remove, transport, and reinstall the solar panels in the most efficient way possible.

Why do I need to move my solar panels?

Building changes. If you're building an extension or otherwise changing the structure of your home, you may need or want to move your solar panels to a different spot on your property. Environment changes. Trees and new building constructions can cast shade on your solar panels, reducing their efficiency.

What happens if you move out of state with solar panels?

If you're moving out of state or don't want to take your solar panels with you, your solar lease agreement will be transferred to the new buyers - if they

don't agree to take over the lease, though, you'll have to buy out the remainder. Moving out of state with a solar panel lease is a consideration for those planning a move.

How much does it cost to move solar panels?

Here's a more detailed breakdown of the costs: Moving the panels themselves costs between \$4,000 and \$8,000, depending on the size, complexity, and how far you're moving. This includes the cost of removing the panels, packing them safely, shipping them to your new home, and reinstalling them.
