

Can you carry a lithium ion battery on a plane

Overview

The short answer is yes, you can bring lithium batteries and lithium battery powered devices on planes. However, there are limits and instructions on how to safely pack them. The key message, according to the FAA, is that items with lithium-ion batteries (like portable electronics and vapes) should be packed in your carry on. Can you carry a lithium ion battery on a plane?

Lithium-ion batteries, including those in laptops and power banks, are allowed but limited to 100 watt hours per battery, with the option to carry up to two larger 101-160-watt-hour batteries with airline approval. Lithium metal (non-rechargeable) batteries are permitted up to 2 grams of lithium per battery.

What types of batteries can you carry on a plane?

Passengers may carry all consumer-sized lithium ion batteries (up to 100 watt hours per battery). This size covers AA, AAA, cell phone, PDA, camera, camcorder, handheld game, tablet, portable drill, and standard laptop computer batteries. The watt hours (Wh) rating is marked on newer lithium ion batteries and is explained in #3 below.

Can you bring a battery on a plane?

Requirements vary based on the type of device and size of battery. Spare (uninstalled) lithium metal batteries and lithium ion batteries, portable rechargers, electronic cigarettes and vaping devices are prohibited in checked baggage. They must be carried with the passenger in carry-on baggage.

Can a lithium battery be carried by air?

You can prepare them for travel by: Whether a lithium battery can be carried by air or not depends on its configuration and its Watt-hour (Wh) rating (for rechargeable lithium-ion/polymer batteries) or Lithium Content (LC) (for non-rechargeable lithium metal batteries).

Can lithium batteries cause a fire on a plane?

Smoke and fire incidents involving lithium batteries can be mitigated by the cabin crew and passengers inside the aircraft cabin. If carry-on baggage is checked at the gate or planeside, spare lithium batteries, electronic cigarettes, and vaping devices must be removed from the baggage and kept with the passenger in the aircraft cabin.

How many batteries can a passenger carry?

Quantity limits: None for most batteries — but batteries must be for use by the passenger. Batteries carried for further sale or distribution (vendor samples, etc.) are prohibited. There is a limit of two spare batteries per person for the larger lithium ion batteries described above (101-160 watt hours per battery).

Can you carry a lithium ion battery on a plane

Can You Bring a Cordless Drill on a Plane? (The Ultimate Guide)

If your drill is too large or has a lithium-ion battery, you may not be able to bring it on the plane. Second, pack your drill in a way that makes it easy to identify. You don't want to have to rummage through your luggage to find your drill when you're going through security.

Wheelchairs with Lithium-ion Batteries: Can They Fly?
