

Cascadia 4x4 solar panel review

Overview

Cascadia 4x4 gets my vote for "instruction booklet of the year." Great photos, hints, tips, and some humor thrown in. This is very welcome because while the install isn't hard, there are many ways to screw it up if you're not careful. Another great resource is Atlantic British's excellent install video: Be prepared to take your.

The Cascadia 4x4 VSS 100W panel on my LR3 had no trouble powering a weekend trip. I was able to run my LR3's center console refrigerated cooler.

The Cascadia 4x4 VSS System is available now through Atlantic British for a wide range of Land Rovers, and through Cascadia 4x4 directly for over 29 different AWD/4x4 vehicles.

Does Cascadia 4x4 have a solar system?

Ultimately I decided on installing Cascadia 4x4's Vehicle Specific Solar (VSS) System 90W Solar Panel for the 5th Gen 4Runner. What I really love about their system is that it makes use of otherwise unused hood space.

Does Cascadia 4x4 have a dual-battery system?

A dual-battery setup was out of the question as I had already set aside the passenger-side firewall (where a second battery is usually installed) for an onboard air compressor. Ultimately I decided on installing Cascadia 4x4's Vehicle Specific Solar (VSS) System 90W Solar Panel for the 5th Gen 4Runner.

Does the Cascadia 4x4 VSS system work?

The Cascadia 4X4 vss system fits my needs perfectly and is working excellently." "My camping night light setup never failed and my beer fridge never warmed above the set 23 degrees. The solar panel blends in well on the JK hood and is one of my favorite mods in the last few years." WANT 5% OFF?

.

Which is better Cascadia 4x4 or victron?

The MPPT controller offered by Cascadia 4x4 is a pre-wired plug-and-play unit that may work better for some, whereas the Victron requires a little more work for added functionality. Solar VSS System with pre-cut vinyl and MPPT Solar Charge Controller.

How do I install a Cascadia 4x4 solar panel?

Cascadia 4x4's provides clearer instructions (with photos) than I can type here. First, peel the 3M tape backing off 3-4 inches. Then, center the solar panel on the vinyl while not allowing the exposed 3M tape to touch. Once you are satisfied with the placement, fully rest the solar panel on the vinyl/hood.

How much solar PV can a Cascadia 4x4 charge controller handle?

According to some chats with Cascadia 4x4, their MPPT solar charge controller is only able to handle 130W of solar PV at 12V. If you would like to learn more about how solar charge controllers are sized, I would encourage you to utilize other online resources as that's a biiiiiit too technical for this post.

Cascadia 4x4 solar panel review
