## Overview

---

What is the State Grid Changji electric power supply company doing?

CHANGJI, China, Oct. 12, 2024/PRNewswire/ -- The State Grid Changji Electric Power Supply Company is strongly committed to the development of renewable energy. To date, JiMusar County has achieved an installed capacity of 1.01 million kilowatts in photovoltaic projects connected to the grid, producing an annual output of 1.6 billion kilowatt-hours.

Will China build a supergrid?

The State Grid Corporation of China has announced it is building a 1.1 million volt transmission line that will be able to deliver the output of 12 large power plants over 2,000 miles. The project is the first of its kind in the world, and a big step in the company's plans to stitch together the grids of neighbouring nations into a supergrid.

What's new at Changji power supply?

CHANGJI, China, Nov. 20, 2024 /PRNewswire/ -- On November 18, the State Grid Changji Power Supply Company successfully deployed an innovative project, "Research on Key Technologies for Managing Temporary Voltage Drops in Distribution Networks and Development of Supporting Equipment," at the 220 kV Changji substation.

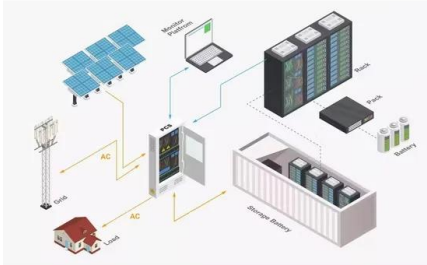

Will Changji-Guquan be the world's largest transmission line?

This will be the largest transmission line in the world, capable of delivering huge amounts of power over thousands of miles from Xinjiang to Anhui. "The Changji-Guquan +/-1,100kV project is a major technical step-up, making it the world's highest DC voltage," said Liu ZeHong, executive vice president of SGCC.
