What are Poland's energy storage subsidy programs?

Poland's 2024-2025 energy storage subsidy programs are a key element in the country's energy transition. With the growing demand for stable energy sources and the integration of renewables into the grid, energy storage facilities take on special importance.

Why should Poland invest in energy storage?

Development of energy production and consumption forecasting systems. Energy storage subsidy programs support the transformation of Poland's electricity grid into a more flexible and resilient system. Investments in storage facilities enable better integration of RES, improve grid stability and enhance the country's energy security.

How can energy storage facilities be improved in Poland?

Introduction of preferential loans for companies investing in energy storage facilities. Increasing the installed capacity of energy storage facilities by 300% by the end of 2025. Increasing the share of RES in Poland's energy mix to 35% in 2025. Reduction of CO2 emissions by 15 million tons per year.

How many photovoltaic micro-installations are there in Poland?

Since its inception, the "My Electricity" program has funded over 530,000 photovoltaic (PV) micro-installations across Poland, significantly contributing to the nation's renewable energy goals. 1□ For PV micro-installations registered by July 31, 2024, energy or heat storage systems are optional but encouraged.

How will the energy storage program affect the electricity grid?

In 2025, the program will continue to support the stabilization of the electricity grid. Energy storage facilities at prosumers help relieve the burden on the grid and improve the efficiency of RES installations, also affecting the benefits of

other market participants.

How much subsidy is available for solar installations?

The maximum subsidy available for solar without storage is PLN 6,000, increasing to PLN 7,000 for solar micro-installations with storage. Any solar installations connecting to the grid after Aug. 1 must be paired with electric storage facilities and/or heat storage facilities to be eligible. The installations can range from 2 kW to 20 kW in size.
