

China photo energy storage

Higher Anti-Rust Performance
Lower Internal Impedance

Overview

How does China Shoto energy storage work?

This is clean energy, with reliable and long-lasting storage operating at high altitude.” Lucie Yi, Deputy Chief Engineer, China Shoto Energy Storage With up to 14 hours of sunlight a day in summer months, the plant produces 30 MW of solar power, supported by 20 MWh of energy storage.

Who is China Shoto?

China Shoto | 2,518 followers on LinkedIn. Energy Storage Expert | Company profile: Shuangdeng Group Co.,Ltd (oversea brand “Shoto”)always focuses on the area of communications,electric power, railway, aviation, military, civil and so on, dedicates to providing a comprehensive energy storage solutions for world-class enterprise.

Who is Shoto?

Shoto, a leading integration service provider of green energy storage in the era of big data.Using cutting-edge energy technology,with our customers around the world,shares a green world.

What does Shoto do?

For the power industry, Shoto is a core hub that creates future smart grid networks. Shoto also supplies new, clean and high-efficiency power energy for the transportation industry to facilitate green travel. Shoto is active in the recycling industry for lead batteries, making energy recyclable and renewable whilst also reducing loss of resources.

Is Shoto a green battery company?

Shoto is the only “China National Environmental Friendly Enterprise” in battery industry. The company has courage to take social responsibility. In response to the policy of “green low-carbon business” and the concept of “New energy, Cyclical, High-tech”, Shoto optimize its management on:.

What is the production capacity of Shoto?

Annual Production Capacity □ 7.5 million KVAH The driving force of the development of Shoto is to study world's most advanced concepts & technologies constantly and then enhance capability of independent innovation. Shoto persists in cooperating with outstanding research institutes.
