

Cleantech energy

Overview

Clean technology, also called cleantech or climatetech, is any process, product, or service that reduces negative environmental impacts through significant improvements, the sustainable use of resources, or environmental protection activities. Clean technology includes a broad range of technology related to , , ,

What is clean technology?

Clean Edge, a clean technology research firm, describes clean technology "a diverse range of products, services, and processes that harness renewable materials and energy sources, dramatically reduce the use of natural resources, and cut or eliminate emissions and wastes."

What does cleantech mean?

Cleantech, is used fairly widely, although variant spellings include (clean-tech) and (clean tech). In recent years, some clean technology companies have de-emphasized that aspect of their business to tap into broader trends, such as smart cities.

What is sustainability & clean technology?

Sustainability when combined with clean technology focuses on the central environmental issues of learning how to fulfill the need of Earth's resources and the requirement for fast industrialization and consuming of the energy.

What is the Cleantech Revolution?

It's exponential, disruptive, and now. The Cleantech Revolution is the third installment of RMI's annual energy transition presentation. In it, RMI charts how the energy system is being disrupted by the exponential forces of renewables, electrification, and efficiency. The past decade has seen remarkable progress and growth in cleantech.

What are Cleantech products & services?

Cleantech products or services are those that improve operational

performance, productivity, or efficiency while reducing costs, inputs, energy consumption, waste, or environmental pollution.

What is a clean technology venture?

The trendsetting firms that design new technologies and devise strategies for the industry to excel and to be more resilient in the face of threats. In 2008, clean technology venture investments in North America, Europe, China, and India totaled a record \$8.4 billion.

12.8V6Ah

Nominal voltage (V):12.8
 Nominal capacity (ah):6
 Rated energy (Wh):76.8
 Maximum charging voltage (V):14.6
 Maximum charging current (a):6
 Floating charge voltage (V):13.6-13.8
 Maximum continuous discharge current (a):10
 Maximum peak discharge current @10 seconds (a):20
 Maximum load power (W):100
 Discharge cut-off voltage (V):10.8
 Charging temperature (°C):0-+50
 Discharge temperature (°C): -20-+60
 Working humidity: <95% R.H (non condensing)
 Number of cycles (25 °C, 0.5c, 100%doD): >2000
 Cell combination mode: 32700-4s1p
 Terminal specification: T2 (6.3mm)
 Protection grade: IP65
 Overall dimension (mm):90*70*107mm
 Reference weight (kg):0.7
 Certification: un38.3/mds
