

Commercial and industrial solar companies

Overview

What is a commercial solar contractor?

A commercial solar contractor is a company that installs solar systems for industrial and community projects. Our definition of “commercial contractor” includes these installations. The companies below are a segmented portion of the overall 2022 Top Solar Contractors list, organized by kilowatts (DC) installed in 2021.

What is commercial solar?

In the context of the analysis, "commercial solar" refers to distributed, behind-the-meter projects with non-residential offtakers. SunPower, Tesla and NRG -- developers with more than 100 megawatts each -- helped to deploy nearly a quarter of the commercial solar market in 2017.

What is the commercial solar market?

Commercial solar is the most fragmented segment of the U.S. solar market, with numerous companies involved in any single project. In a free research note, GTM has aggregated data from the top engineering, procurement and construction (EPC) providers, project developers, asset owners and other leading companies in the U.S. commercial solar market.

Who uses commercial solar?

Commercial solar is utilized by a diverse range of businesses and institutions, including: Residential solar installations are almost always on the roofs of homes because that is the best, most expansive surface area where the panels can catch the sunlight.

Which companies are leading the commercial solar market in 2017?

SunPower, Tesla and NRG -- developers with more than 100 megawatts each -- helped to deploy nearly a quarter of the commercial solar market in 2017. SunPower is a clear leader based on both its direct installation business and

channel partner business, which was the main source of SunPower's 2017 growth.
