

Commercial solar california

Overview

Is commercial solar a good investment in California?

Commercial solar solutions investment in California requires capital that many businesses are not ready to use. Up front costs can be substantial and intimidating. California manufacturers with high energy demand are businesses that could benefit from commercial solar almost instantly.

What are the benefits of commercial solar in California?

Along with the proven financial benefits of a commercial solar solution in California, there are growing intangible benefits that bolster project economics, such as employee recruiting and retention, customer satisfaction, company image and reputation in their community along with other factors that help businesses stand above their competitors.

Where can I find commercial solar installers in California?

If you're searching for commercial solar installers in California, contact Sunistics. Get a proposal within a few days by calling us at 323-393-0375 or emailing customer@sunisticsgroup.com. Sunistics is located at 2272 Colorado Boulevard, Los Angeles, CA, 90041, United States.

Who can benefit from commercial solar?

California manufacturers with high energy demand are businesses that could benefit from commercial solar almost instantly. Lowering your electricity costs frees up money to reinvest in your company. Revel Energy's commercial solar typically saves customers 50-80% on the electricity bills.

Why is solar so popular in California?

Solar is a proven technology and California is the nation's largest market for rooftop commercial solar solutions. As electricity costs increase, solar adoption rates in both commercial and residential sectors continue to rise. Since 2010, the price of solar panels have fallen drastically as global solar

deployment has increased by over 400%.

Is investing in commercial solar a good decision?

Commercial solar is a good investment for businesses, typically offering a return on investment (ROI) in about three years due to major tax credits and significant savings on electricity bills. Currently, these savings can be as much as 80%. However, with changes coming to California, these numbers might not be around for much longer. Get a quote for Energy Storage.

...

Commercial Solar Panels in Northern California

Many California solar panel systems have a return on investment that rivals traditional investments. This is because of the substantial cost savings from switching to solar. The solar equipment we install exceeds traditional investments in that the initial investment is typically paying for itself within ten years, and then the following 15-20 years are at a profit.
