

Commercial solar company fayette county

Overview

How much energy would a solar farm generate in Fayette County?

Silicon Ranch's proposed farm would generate between 80 to 100 megawatts of energy. That's a little less than 3% of the total electricity needed in Fayette County. There aren't 800 acres of available industrial land in Fayette County to put a solar farm, Turner has previously said.

Will Fayette County Co-op get a solar system?

Co-op officials are currently seeking regulatory approval for a pair of solar installations in Fayette County, which would generate renewable energy for co-op members. Nick Comer, external affairs manager for the co-op, said the project will cut emissions from the grid equivalent to the annual pollution from 554,000 gasoline-powered cars.

Could a 384-acre solar farm be used in Fayette County?

The group has an option to purchase 797 acres in the Haley Road area adjacent to East Kentucky Power Cooperative proposed 384-acre solar farm. That means a little less than 1,200 acres of Fayette County farmland could be used for solar production in coming years.

Will a solar farm open floodgates in Fayette County?

There aren't 800 acres of available industrial land in Fayette County to put a solar farm, Turner has previously said. Others are worried that the text amendment allowing solar will open the floodgates to other large-scale solar farms. That's not true, Spurgeon said.

Should you choose a solar company in Fayetteville?

As a homeowner or business owner in Fayetteville, you may be planning on switching to solar energy and wondering about the best solar companies in your area. Solar could be a fantastic choice since it comes with many benefits. Solar power isn't just good for the environment — your budget will benefit too.
