Overview

What are the most common solar panel problems?

By far the most common solar panel problem - 15% of owners told us they'd had problems with their solar inverter. Inverters aren't expected to last as long as the solar PV panels themselves, so you're likely to have to replace yours at least once over the course of your solar panels' lifetime.

Why should solar power professionals know about common solar panel problems?

Thus, solar power professionals need to be knowledgeable about common solar panel problems to better service solar clients and prevent underperforming solar assets. Regular maintenance and performance modeling can help prevent revenue loss for solar system owners through early detection and corrective action.

Are solar panels defective?

While modern manufacturing processes are constantly improving, solar panels can still develop defects during production. These common solar panel defects can impact performance, longevity, and safety. The first group of defective solar panels is related to cell issues that are easy to notice even before installation.

Can discoloration damage a solar panel?

In some cases, severe discoloration could potentially indicate damage, although the presence of discoloration does not necessarily imply a solar panel defect. The most common defects in solar panels include issues such as hot spots, snail trails, and imperfections in the materials.

What happens if a solar PV system fails?

But if your solar PV system does have problems, it can mean it stops producing electricity and needs urgent maintenance. That can be costly when

you're used to using free solar power and have to use pricey grid electricity instead. Plus, you'll lose out on any payments you get for exporting electricity.

Can damaged solar panels cause power loss?

After learning how damaged solar panels can result in power loss, let's explore another common issue: hotspots in solar panels. This problem arises due to electrical issues, often triggered by improper installation or broken wiring, which can lead to power loss or even fires.
