

Consumer reports solar panels

Overview

Before you install solar panels on your roof, find answers to these 8 questions to make sure solar will save you money and energy.

That depends on what you're spending on electricity, the amount of power that an installed solar photovoltaic (PV) system can provide, your finances.

If your roof is old, the answer is no—at least not until you replace it. Asphalt shingles that are 10 years old or more should be replaced before adding a solar array on top, says Ana Almerini, a spokesperson for SolarReviews. New solar panels are warrantied.

Leasing is commonly marketed as a way to finance a solar installation for those who aren't using cash. The benefit of leasing—usually a 20-year commitment—is that you put no money down. Your energy bills are instantly lower, based on a formula.

The most powerful savings tool for homeowners who buy their solar systems is the federal solar tax credit, available for installations through 2033. It allows you to subtract 30 percent of the cost of buying and installing solar heating, electricity generation, and other solar.
