

# Cypress solar panels

## Overview

---

Are Cypress Creek solar panels a key power plant project?

Exciting news from RE+ 2024, we have just confirmed our solar panels have been chosen by Cypress Creek Renewables for key power plant projects across the U.S. Notable among these is Cypress Creek's largest hybrid facility, Zier, in Brackettville, Texas.

What is Cypress Creek's largest hybrid solar facility?

Commercial operation for Cypress Creek's largest hybrid facility, Zier, in Brackettville, Texas, commenced in May with 208MW of photovoltaic capacity provided by more than 383,000 Maxeon Performance line solar panels. The Zier Hybrid Solar Site can generate enough energy to power over 41,000 homes in Texas each year.

Is Cypress Creek a solar company?

Cypress Creek, founded in 2014, operates nearly 1 GW of solar and storage assets across Texas, including 18 Cypress Creek-owned projects. The company has a 6 GW pipeline of 24 utility-scale projects in construction or development, including a 100 MWh standalone battery project planned to reach operations in the Houston area next month.

Who is Cypress Creek Renewables?

Cypress Creek Renewables is powering a sustainable future, one project at a time. Led by an experienced management team, we develop, finance, operate and own utility-scale and distributed power plants across the country.

Who is Cypress Creek?

With 12 gigawatts of solar developed to date and 4 gigawatts currently operated, Cypress Creek is one of the country's leading solar and storage companies. We leverage Cypress Creek's unparalleled scale to take projects from development to operation. We develop, own, and provide O&M Services

for owned and third-party solar and storage assets.

How has Maxeon partnered with Cypress Creek Renewables?

The success of the collaboration between Maxeon and Cypress Creek Renewables has resulted in Maxeon providing modules for additional Cypress Creek projects across the country including in New York and Washington states.
