

# **Disadvantages of balcony solar power generation**

## Overview

---

What are the disadvantages of balcony solar panels?

Another disadvantage of balcony solar panels is that, depending on the set-up, they take up most of the balcony – one panel is around two square metres. You can free up space on the balcony if you opt to hang the solar panels from the balcony railings or wall.

Are balcony solar panels a good idea?

With advancements in technology and increasing demand for solar energy, more people who live in compact spaces are beginning to opt for balcony-mounted solar panels, with over one million European households being solar-powered. What Are the Advantages of Having a Balcony Solar System?

Balcony solar panels come with many advantages.

What is the difference between a balcony power plant and a PV system?

A balcony power plant and a PV system are both types of solar plants, which use solar energy to generate electricity. The main difference, however, is in size and performance. A balcony power plant is usually smaller with a maximum output of 600 watts (inverter output) and is therefore better suited for personal consumption.

How many solar panels can be installed on a balcony?

People with particularly large balconies might be able to fit two 400 watt (W) panels, whereas the average roof will fit 10 350 W panels. Fewer panels also mean less electricity being generated. Most homeowners won't be able to power their whole home with balcony solar panels.

Do solar panels work on balconies?

Solar panels on balconies can work well, as long as nothing is obstructing light from reaching the panels. For example, balcony walls, nearby trees, or

buildings can cast a shadow on the solar panels and reduce their electricity output. The angle and direction the solar panels will also affect their output.

How much do balcony solar panels cost?

Installing balcony solar panels that are connected to the home's electrical system costs around £1,405 for two 350 W panels – most balconies won't have room for more than this. Are there any grants for balcony solar panels?
