

# **Disposal plan for discarded photovoltaic panels**

## Overview

---

How to deal with solar PV waste material?

Therefore, the methods of dealing with solar PV waste material, principally by recycling need to be established by 2040. By recycling solar PV panels EOL and reusing them to make new solar panels, the actual number of waste (i.e., not recycled panels) could be considerably reduced.

Do solar panels have a waste disposal plan?

Despite the presence of environmental awareness, California, another world leader in solar panels, also has no waste disposal plan. At the end of their useful lives, only Europe requires the manufactures of solar panels to collect and dump solar waste.

How much solar PV waste will be recycled by 2050?

The worldwide solar PV waste is estimated to reach around 78 million tonnes by 2050. The current status of the EOL PV panels are systemically reviewed and discussed. Policy formation involving manufacturer's liability to inspire recycling of waste solar panels. R&D needs acceleration allowing researchers to resolve issues in PV module recycling.

Will solar PV module waste be repurposed by 2040?

The estimated cumulative worldwide solar PV module waste (tonnes) 2016–2050 [13, 14]. 7. Conclusion Based on the swift growth in the installed PV generation capacity, we propose that the number of EOL panels will necessitate a strategy for recycling and recovery which need to be established by 2040.

Can solar PV panels be repurposed by 2050?

This report is the first-ever projection of PV panel waste volumes to 2050. It highlights that recycling or repurposing solar PV panels at the end of their roughly 30-year lifetime can unlock an estimated stock of 78 million tonnes of

raw materials and other valuable components globally by 2050.

Should solar PV panels be recycled?

We recommend that recycling should be made commercially necessary by making manufacturers responsible for recovering materials from solar PV panels EOL. In summary, the management of panels EOL and other hazardous waste is obligatory.

## Disposal plan for discarded photovoltaic panels
