### **DNV: China to more than quintuple renewable energy**

Norwegian analyst DNV has published its latest outlook for China's energy industry, which is headlined by the prediction that China will more than quintuple renewable energy installations

### **DNV GL defines renewable energy solutions to accelerate the energy**

Report "Transition Faster Together: Renewable solutions, strategies and policies for a clean energy future" outlines focus areas to further stimulate renewable energy generation and reduce CO2 emissions ARNHEM, The Netherlands, 11 August 2020 - DNV GL today published a new report outlining how the energy transition can be accelerated through the ...

### **2024 DNV Environmental and Permitting Services**

DNV's EPS team focuses on renewable energy projects and consequently has an in-depth understanding of the project design requirements and their unique environmental issues. By working on over 30,000 MW of renewable energy throughout North America, our permitting project managers and scientists have a comprehensive understanding of efficient project ...

[Discover our energy research programs](#)

Rapid growth of renewable generation in

combination with electrification of demand is one of the key solutions to energy security, carbon emission reduction and long-term affordable energy. Insight in new technologies, patterns, power market impact, system level impact and timing are essential for investors, operators and users alike.

### Renewables Certification

Drawing on expertise from across the energy industry and beyond to ensure our renewable energy standards reflect current understanding and best practices. Thanks to more than 40 years' experience in the wind energy industry, we ...

### [Energy Systems :: DNV Careers](#)

Renewables have become a major priority for industries and governments. And it's the same story at DNV. By joining DNV Energy Systems, you will collaborate with like-minded experts across the globe on innovative projects ...

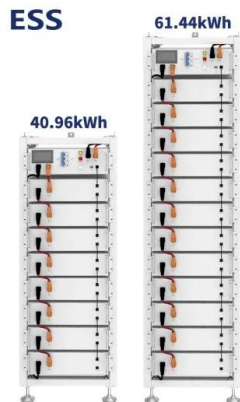

### [Energy Transition Outlook 2024](#)

DNV's annual Energy Transition Outlook presents the results from our independent model of the world's energy system and provides a detailed forecast through to 2050 of how the shift from fossil energy to renewables is likely to unfold and what it means for global greenhouse gas emissions.

Renewables 2024 - Analysis

Renewables 2024 - Analysis and key findings. A report by the International Energy Agency. This edition of the IEA's annual Renewables market report provides forecasts for the deployment of renewable energy technologies in electricity, transport and heat to 2030

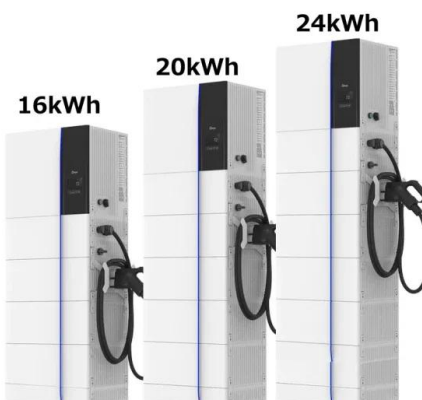

**DNV Renewables Services**

This document summarizes the presentation by DNV Renewables Services on during the Photovoltaic Validation and Bankability Workshop in San Jose, California, on August 31, 2011. Created Date 9/2/2011 1:19:38 PM

**DNV GL combines Oil & Gas and Power & Renewables ...**

DNV GL, the assurance and risk management company, will combine its current Oil & Gas and Power & Renewables businesses into one new business area called Energy Systems.

**Energy management**

Use energy more effectively and efficiently for you and your stakeholders The trademarks DNV GL®, DNV®, the Horizon Graphic and Det Norske Veritas® are the properties of companies in the Det Norske Veritas group.

Energy Finance: the future is digital

CARLOS ALBERO Renewable energy is going mainstream. Global investment in energy went up to 1.8 trillion US Dollars in 2018 and 332 billion US Dollars went to the power sector. This is the third year in a row in which the power sector outpaces the oil and gas

**Power and renewables advisory, certification, ...**

We offer independent advice and expertise spanning energy generation, including onshore and offshore wind and solar PV, transmission and distribution, grids, storage, e-mobility, as well as energy management, energy markets and ...

Renewables asset management

DNV's asset management service for renewable energy helps you maximize production, reduce costs and ensure grid reliability. Effective and efficient asset management is essential for maintaining grid reliability and being a successful network operator. During the

## Energy storage

Navigating the challenges of energy storage The importance of energy storage cannot be overstated when considering the challenges of transitioning to a net-zero emissions world. Storage technologies offer an effective means to provide flexibility, economic energy trading, and resilience, which in turn enables much of the progress we need to make in power generation

...

## Renewables Certification

If you are in the renewable energy industry, then DNV's independent accredited certification services offer you the best route to gaining customer confidence. The trademarks DNV GL®, DNV®, the Horizon Graphic and Det Norske Veritas® are the properties of

## DNV supports Australian renewable energy development

DNV, the independent energy expert and assurance provider, has been instrumental in securing AUS\$650 million (US\$425 million) in financing for Akaysha Energy's Orana battery energy storage system (BESS) project in ...

## [Senior Business Developer - Renewable Energy](#)

Are you passionate about building global connections and nurturing relationships? Are you ready to drive the full sales lifecycle of our data-driven digital solutions for renewable energy, leveraging your commercial acumen and customer-centric approach? Are you thriving in fast-paced environments? If so, read further and apply to be at the heart of the green revolution! As a ...

### Services

Main service categories. Advisory. Full suite of advisory services for across the entire energy value chain from policy to use. Certification. Accredited certification of transmission and distribution equipment; renewable energy equipment ...

### [Harnessing AI for a greener future:](#)

DNV's Forecaster delivers insight into renewable energy supply and demand through reliable, data-driven predictions to help you maximize profits, avoid missed opportunities and optimize operations.

### The rise of renewables

By 2050, the global power system will be 70% reliant on variable renewable energy sources (VRES). Coal and gas decline to 4% and 8% respectively of the power mix by 2050, when they are largely confined to providing flexibility and backup in a power system.

### [Renewable energy technology](#)

DNV supports customers with qualification testing under dynamic real-life conditions in our gas laboratory, verification and certification of fuels, fuel technology and renewable energy technology, driving research, development and commercialization of safe and reliable technologies.

### AI and Technology: Rethinking energy consumption

NARRATOR Welcome to the DNV Talks Energy podcast series. Electrification, rise of renewables and new technologies, supported by more data and IT systems, are transforming the power system. Join us each week as we discuss these changes with guests

### DNV supports Atlas Renewable Energy in securing financing for ...

DNV has supported Atlas Renewable Energy in securing \$289 million in financing for its first standalone Battery Energy Storage System (BESS) project in Chile. The financing package, backed by senior loans and credit lines from BNP Paribas and Crédit Agricole CIB, will fund the development of Battery Energy Storage System del Desierto, one of the ...

### [Renewables project engineering](#)

DNV gives you all the renewables Project engineering support you need through every stage of building and managing an energy project. Wind turbine appraisal DNV's turbine appraisal service guides you to choosing the best models for your project, together with an overview of technical risks and their mitigation.

### [Download our Energy Transition Outlook 2024](#)

DNV's annual Energy Transition Outlook presents the results from our independent model of the world's energy system and provides a detailed forecast through to 2050 of how the shift from fossil energy to renewables is likely to unfold and what it means for Main

## Renewables

The renewables group covers two renewable technologies: wind and solar. The purpose of the group is to make sure that DNV stays at the very forefront of research and its application to our business and the industry as a whole. The group covers more traditional
