

Do I need a high altitude permit to install photovoltaic panels

Overview

Do you need planning permission to install solar panels on your roof?

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the topic of planning permission and building regulations often comes to the surface.

Do I need planning permission to install a solar PV system?

This ammendment clasifies the installation of a residential solar PV or solar thermal system as 'permitted development' meaning planning permission is not required before work commences assuming that the installation fulfills the following conditions:.

Do solar panels need planning permission?

The solar PV array must not face onto or be visible from the highway if located within a conservation area or a world heritage site. Ground mounted systems of greater than 9m sq (4-5 large solar panels) will require planning permission.

Do you need planning permission for solar panels on flats & apartments?

Gaining planning permission for solar panels on flats and apartments is possible, and whether you'll require permission is based on the same factors as for houses. However, planning permission for flats and apartments comes with a bit more administrative red tape.

Can I install solar panels if I don't meet building regulations?

Your local authority can also apply for a Confiscation Order to take away any money you've earned with your system – so there's absolutely no benefit to installing solar panels that don't meet building regulations. It's crucial that your solar installation follows all building regulations.

Can solar panels be built without permission?

This is because they generally fall under permitted development rights, which allow homeowners to make reasonably sized changes without getting permission. The exceptions to this rule are typically flats, listed buildings, homes in conservation areas, and ground-mounted installations. What are the building regulations for solar panels?
