

Do solar panels lose money

Overview

Installing solar panels on your home makes no difference to how much it's worth, according to two thirds (67%) of estate agents. Are solar panels a good investment?

Buying solar panels is a long-term investment that should help cut your electricity bills and carbon footprint. But will they pay for themselves and earn you money?

Solar panels are often marketed as a way to save money on electricity – and sometimes as a way to make money too.

Are solar panels worth it?

The pros of solar panels are immense, and if you can afford the upfront cost they are absolutely worth getting. With solar panels, the average three-bedroom home will save £454 a year on their energy bills. And if you're exporting excess electricity to the grid via the SEG, you'll make an additional £160 per year.

How much do solar panels save on electricity bills?

We've seen how much solar panels save on electricity bills. Now let's look at their investment value. Taking the average installation cost of £5,000 for a system this size, with £678 in revenue the Year 1 nominal rate of return will be 6.6%. We can then use this figure to project your solar panels' return on investment going forward.

Can solar power save you money?

Solar electricity is a clean, renewable energy source. A typical home solar panel system could save around one tonne of carbon per year, depending on where you live in the UK. That's the equivalent of driving 3,600 miles, or from London to Bristol 30 times. Export the electricity you can't use yourself and get paid for it.

Are solar panels worth it in the UK?

Solar panels are definitely worth it in the UK. The average three-bedroom household will save 70% on its electricity bills by going solar, and break even on the cost of its panels after just 15.66 years. It's a large upfront cost - but if you can afford it, solar panels make an excellent investment.

How much do solar panels cost?

The price of a typical 3.5 kilowatt-peak PV solar panel system is about £7,000. Based on the Energy Saving Trust's figures, it could take someone living in the middle of the country, in a typical home, anywhere between 12 and 17 years to recoup the costs of installing panels, based on current Energy Price Cap rates.
