

Do you use your own pads when installing photovoltaic panels

Overview

Can I DIY my solar panel installation?

If you've researched solar energy solutions, you probably know that it's possible to DIY your solar panel installation, often referred to as DIY solar. But as it turns out, DIY solar can mean something more than just installing your own solar panels — it can mean building your solar panels from scratch.

Should I buy a DIY solar panel kit?

To save cash, you may be tempted to buy a DIY solar panel kit and fit your panels by yourself. DIY solar panels are widely available and many are excellent value compared with the cost of professional installation. For example, a full 3.4kW 10-panel kit from Plug-in Solar costs £4,728.

Are DIY solar panels legal in the UK?

Yes. UK law is pretty relaxed about DIY solar panels, and in most cases you don't even need planning permission to install a full-sized array of solar panels by yourself. But going DIY may mean you miss out on government schemes, product warranties and utility company support, because you won't have the necessary paperwork or certification.

Where can I buy DIY solar panels?

Several companies specialise in selling DIY solar panel kits to the public. Plug-in Solar is particularly easy to follow, and offers a wide range of kits and step-by-step DIY guides, plus accessories such as solar panel mounting kits. Renology, Select Solar and Sunstore Solar are also well worth a browse.

Do solar panels need a battery?

Some people also decide to pair their solar panels with a solar battery, which will store excess solar energy to be used on cloudy days or during the night time. If you have a solar battery in your system, the battery also needs to be connected to the inverter at this point. Find out more about how solar

batteries are installed on our page.
