

Does photovoltaic panel installation require certification

Overview

The short answer is yes, in most cases, you will need MCS certification to install solar panels. Do you need an MCS certification for solar panels?

There are MCS certifications available for solar panels and installers, which when combined should mean your installation goes smoothly. You should also look for products and specialists with a Flexi-Orb certification, which will ensure the same high standards. Why is the MCS certificate important?

.

Do solar panels need a Microgeneration Certification Scheme (MCS) certificate?

Although it's not strictly required for your solar panels to have a Microgeneration Certification Scheme (MCS) certificate, it's highly recommended. Government data shows the MCS has certified over a million installations since its launch in 2007 and has around 2,000 registered installers.

What are the requirements for a solar PV installation company?

Competency criteria: The installation company needs to prove they have skilled employees who meet the MCS 025 Standard. This involves identifying a Nominated Technical Person (NTP) who has completed an MCS approved training course for solar PV technology.

Where can I find a certified solar installer?

The MCS website has a handy database where you can search for certified installers by their name and location – just pop in their details and the site will confirm if they're registered, as well as their unique Certification Number. How do you get your MCS certificate for your solar panels?

.

Do you need a 'suitable certification' to install solar?

Ofgem states that anyone installing solar PV, wind, and micro-CHP installations up to 50 kW needs to demonstrate that the installation and installer are 'suitably certified'. It also states:.

What if a solar product or installer isn't MCS accredited?

If a solar product or installer isn't MCS accredited, it's worth being a bit cautious. Although it's not a legal requirement for installers to be MCS accredited, consumers need to have a certificate for their solar panels if they are applying for financial funding through an incentive scheme, such as the Smart Export Guarantee (SEG).
