WORKING PRINCIPLE

Overview

An increasing number of people are investing in solar energy. More and more homes are having solar panels, or solar tiles, installed on their roofs. Of course, with such installations, the.

In addition to the official regulation that surrounds PV installation, it is essential to consider some of the practicalities that come with having solar panels fitted. The orientation of the.

Regardless of whether or not planning permission is required for the installation of your solar panels, the installation itself is still subject to standard building regulations. You will need to check that your roof is capable of.

In April 2008, changes to legislation were made. This deemed that the installation of solar panels became a permitted development. As a result of this, planning permission is no longer.

In the vast majority of cases, installing solar PV will not require any form of planning permissions. This is because solar panels are (as mentioned earlier) permitted developments (or PD) under the relevant legislation. If you.
