

# **Does the photovoltaic fund belong to the GEM**

## Overview

---

The that administers government grants for domestic photovoltaic systems, the , estimated that an installation for an average-sized house would cost between £5,000–£8,000, with most domestic systems usually between 1.5 and 3 kWp, and yield annual savings between £150 and £200 (in 2008). The Green Energy for Schools programme was intended to provide 100 schools across the UK.

Are there government grants for solar panels in the UK?

In summary, this is the current situation with solar panel government grants and funding in the UK: There are no government grants for solar panels. There are no free solar panels on offer. However, you can take advantage of the Smart Export Guarantee.

Are green homes grants still available for new solar panels?

Please note: the Green Homes Grant, as well as the feed in tariff are no longer available for new solar installs. You can earn money from your solar panels via the Smart Export Guarantee. The VAT reduction scheme means you will pay 0% VAT on new solar panels, which are set to run between April 2022 and April 2027.

How do free solar panel schemes work?

'Free' solar panel schemes, also known as rent-a-roof schemes, used to be commonplace a few years ago. These were run by companies eager to cash in on the feed-in tariff (FIT). This guarantees payment in return for electricity generated using renewable technologies, including solar power.

Who is eligible for solar PV panels?

To be eligible for solar PV panels, your home needs to meet these specific requirements: Have an income of less than £31,000. Currently have an inefficient heating system within the D-G energy efficiency band. Own your home and live in it, or live in private rented accommodation (requires permission from the landlord).

How much does a photovoltaic system cost?

The Energy Saving Trust that administers government grants for domestic photovoltaic systems, the Low Carbon Building Programme, estimated that an installation for an average-sized house would cost between £5,000-£8,000, with most domestic systems usually between 1.5 and 3 kWp, and yield annual savings between £150 and £200 (in 2008).

Are solar PV installations sold between companies?

However, we are aware that in some instances solar PV installations are sold between companies, especially when companies go out of business. This change in ownership may not be communicated to the homeowner.
