How do you draw a solar system ring?

At the bottom left corner of your drawing area, draw a large half circle, this will depict the sun. Continue drawing the curving line pattern leading to the furthest top right corner. Overlapping each of the previously drawn solar system rings, draw each of the planets on each ring according to their size and shape.

How do you draw a planet around the Sun?

Every planet in the solar system orbits around the sun. To show this in your drawing, draw a curved path coming off of the top and bottom of each planet. Extend the paths toward the Sun and off the edge of the page to show that each planet travels around the sun. Make sure none of the orbital paths you draw intersect with each other.

How do you scale a solar system?

Use the scaled-down distances to draw the solar system to scale. Start by drawing the Sun on a piece of paper. Then, measure and mark the scaled-down distances from the sun for each planet using a ruler. When you're finished, draw the planets over the marks you made.

How do you draw planets in order?

Make images of the planets in this order from the sun: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune. Sketch rings between the planets to

indicate their orbital paths. Draw the Sun near the left side of the page. The sun is the largest body in the solar system, so draw a large circle to represent it.

How do you draw the orbital path of a planet?

Sketch the orbital path of each planet to finish your drawing. Every planet in the solar system orbits around the sun. To show this in your drawing, draw a curved path coming off of the top and bottom of each planet.
