Utility-Scale ESS solutions

Overview

What is a Dynamapower energy storage system?

This energy storage system is designed especially for behind-the-meter energy storage applications such as Demand Response/Demand Charge Reduction and Backup Power. The energy storage system is based on Dynamapower's patent-pending MPS-250 Smart Energy Storage Inverter (UL 1741 SA listed) integrated with Samsung E2 batteries.

What types of power conversion equipment does Dynamapower offer?

Dynamapower is a trusted leader in all types of power conversion equipment including high-power rectifiers, inverters, DC/DC converters, integrated battery energy storage systems, and transformers for use in hydrogen, e-mobility, energy storage, industrial, mining, defense, and research applications.

Why should you choose Dynamapower?

With Dynamapower's fourth-generation inverters and long history with microgrids, we deliver the right products for each individual project, backed by deep design and engineering expertise. Our patented Dynamic Transfer enables fast, autonomous grid to off-grid switching, and our systems can black start small to large loads.

Where is Dynamapower located?

With headquarters and a 150,000-square-foot vertically integrated manufacturing facility in South Burlington, VT, Dynamapower is collaborating with its partners and clients to shift the way our world uses power and advance our resilient, clean energy future. Learn more at dynamapower.com.

How much does a Dynamapower cost?

Let's find out. The Dynamapower drivers, fairway woods and irons will be available from March 2023 with an RRP of £599.99, but some retailers are

offering them for a slightly lower price. For example, in the UK, at American Golf, you can pre-order for £579.00. In the US, you can buy direct from Wilson.

Who is Dynapower?

About Dynapower Since 1963, Dynapower, a Sensata Technologies company, has provided power electronics solutions, along with an array of aftermarket services focused on continuous reliability and efficiency to an ever-expanding global customer base.

Power Conversion & Energy Storage: 2019 Dynapower Projects

We're proud to be a leader in the energy storage market with more than 500MWs of commercial and utility-scale energy storage systems installed worldwide. In 2019, we designed, built and commissioned the nation's largest behind-the-meter energy storage project at the Encore Boston Harbor resort in Everett, Massachusetts.

[MPS-125 Energy Storage Inverter](#)

Multiple MPS-125 energy storage inverters can be paralleled together to scale to meet the needs of any behind-the-meter energy storage installation. With all the functional capabilities of the grid-scale CPS inverter family, the MPS-125 supports frequency, voltage, and VAR support applications.
