

Ec600 power control system

APPLICATION SCENARIOS

Overview

How does the ec600 system work?

2.2 Activating the System The EC600 system has a shutdown feature that can be used when the vehicle is in storage. This allows the leisure electronics to be turned off when not required to save battery power. When in the off state the alarm and tracking system supplies are still active, all other supplies are turned off.

What parts are included in the ec600 & ec700 replacement parts section?

This section is for the EC600 system power supply units and control panels, replacement parts only. This section is for the EC700 system power supply units and control panels, replacement parts only. Replacement products only for the EC800 system in Swift Caravans and Motorhomes.

What is the ec620 control panel used for?

The EC620 Control Panel can be used in conjunction with the EC600 Series Power Supply Unit, for control and monitoring of electrical systems fitted in a leisure vehicle such as batteries, chargers, lighting, water tanks & solar panels. Helpful?

Sargent EC620 Power Control System

Anyone really up on the Sargent EC620? We have a 2018 Swift 122 with this type of control panel and find the advice from the dealer insufficient and conflicting. We've got a step that doesn't extend fully and the instructions are supposed to be on the panel, but can we find them? NO!! Also

EC600

NOTE: The system can only control the power being used by the heating system / water boiler, it cannot control the microwave, hob or 230V socket outlets. How do I test it? Firstly, you need to ensure the heating system is setup to be controlled by the EC600 system so that the heating can be turned down automatically if required.
