

# Ecdis backup power requirements

## Overview

---

ECDIS shall be fully independent and both supplied from the ship's main and emergency source of power. In addition, a reserve power source (UPS mode) with a capacity of at least 30 minutes is to be provided if change-over of the source of power entails restarting of ECDIS. What are the ECDIS back-up requirements?

MIN 445 state that the MCA considers that the following will meet the adequate back-up requirements for ECDIS: (1) an independent, fully compliant second ECDIS unit, connected to ship's main and emergency power supplies; or (2) an appropriate folio of paper nautical charts (as stated in the footnote SOLAS Regulation V/19. 2. 1. 5).

What are the ECDIS back-up requirements for Australian flagged ships?

For Australian flagged ships, there are two options to meet the back-up requirements for ECDIS. A second, fully compliant ECDIS which must be independent of the main ECDIS and connected to the ships main and emergency power supply (refer SOLAS Regulation Chapter II-1).

What information should be included in ECDIS back-up arrangements?

.3 The chart or chart data edition and issuing date should be indicated. The information displayed by the ECDIS back-up arrangements should be up-to-date for the entire voyage. If an electronic device is used, it should provide an indication: .2 if own ship's position is covered by a chart at a larger scale than that provided by the system.

What is a ECDIS back-up system?

The function of a back-up system is to enable safe takeover of the ECDIS functions (to ensure that an ECDIS failure does not develop into a critical situation), and to provide means of safe navigation for the remaining part of the voyage. For Australian flagged ships, there are two options to meet the back-up requirements for ECDIS.

What is the primary function of ECDIS?

The primary function of ECDIS is to contribute to safe navigation. 1.2 ECDIS with adequate backup arrangements may be accepted as complying with the up-to-date charts and nautical publications required by regulations V/19 and V/27 of the 1974 SOLAS Convention.

Do ships need ECDIS?

relevant government institutions. Ships required to fit ECDIS and ships choosing to use ECDIS to meet the chart carriage requirements of SOLAS should carry ENCs or, where ENCs are not available at all or are not of an appropriate scale for the planning and display of the ship's voyage plan, raster navigational charts (RNC) and/or any needed
