

Edison solar power quote

Overview

What did Thomas Edison say about solar energy?

In 1920, Thomas Edison said, "I'd put my money on the sun and solar energy. What a source of power! I hope we don't have to wait until oil and coal run out before we tackle that. I wish I had more years left." Today, Perovskites are transforming solar energy in just the way Edison envisioned.

What did Thomas Edison say to Henry Ford?

In 1931, Thomas Edison supposedly told his friend Henry Ford: "I'd put my money on the sun and solar energy. What a source of power! I hope we don't have to wait until oil and coal run out before we tackle that."

What did John Firestone say about solar power?

According to the quote, John Firestone details a conversation in which Edison expressed his belief in solar power. 'I'd put my money on the sun and solar energy,' said Edison. 'What a source of power! I wish I had more years left!'

What did Henry Ford say about solar energy?

In 1931, not long before he died, the inventor told his friends Henry Ford and Harvey Firestone: "I'd put my money on the sun and solar energy. What a source of power!.

What did Edison think about building energy?

At the turn of the 20th century, when Edison was at the height of his career, the notion that buildings, which now account for more than a third of all energy consumed in the United States, would someday require large amounts of power was only just coming into focus.

Why is Thomas Edison important today?

Thomas Edison, one of the world's most prolific inventors and whose

contributions changed modern life, understood the importance of solar power in the world's future energy mix and the danger of an over reliance on fossil fuels - and he had this understanding nearly 80 years ago. Edison is associated with many innovations we take for granted today.
