Clean Operations Cobb EMC is committed to powering a clean energy future. Our office is equipped with 1.5 MW of solar, a 13,140 kWh solar flower garden, 1 MW/4 MWh of battery storage, and a 1 MW natural gas generator. These resources combined create a microgrid that helps us power our operations with renewable energy and save on power costs, all while ...

Solar Energy

Important! If you have already contracted with someone, or have decided to install on your own, it is important to contact us prior to installation. This could save you considerable headaches, and possible added costs. (800) 342-0134. Fact Sheet on Solar Energy

Smart Solar Program

Solar is not a workable solution for all homes, and not all cooperative members can install a system on their roof. But that doesn't mean that solar power isn't still an option. One of the

New Solar Facilities Provide Renewable Energy to Jackson EMC ...

Three solar facilities that provide renewable energy to Jackson EMC have been completed, according to Green Power EMC, the renewable energy provider for 38 electric cooperatives in Georgia. With the completion of the facilities, 200-megawatts of solar energy can entirely serve renewable energy to more than 35,000 homes in Georgia. The plans for t

Jackson EMC to Receive More Renewable Energy from New Solar ...

Jackson EMC members will receive solar energy from a new project under construction in South Georgia designed to provide even more renewable energy into the homes of members. Jackson EMC is one of 16 Georgia electric cooperatives partnering together to purchase energy from three new solar facilities. When completed, the solar sites will genera

Cooperative Solar

Cooperative Solar allows EMC member-consumers the opportunity to purchase solar power, regardless of the location of their home or whether they own or rent. The electricity received is generated at off-site solar facilities and energy shares can be purchased from participating EMCs at a nominal monthly rate.

Rooftop Solar

Get the Facts If you're considering installing solar power at your home, you need to know all the facts. There is a lot of misinformation out there and door-to-door salespeople who are making unrealistic promises about rooftop solar. If you're not careful, you could end

Solar Energy in Singapore: Exploring Projects and Incentives

Solar Energy Adoption Across Singapore Solar energy is catching on fast in Singapore as people and businesses see how it can change the way we get our electricity. The benefits of solar panels extend beyond reducing carbon emissions; they also offer significant long-term cost savings on energy bills while enhancing energy independence.

Energy Sources

Green Power EMC procures renewable energy from solar, landfill gas, hydro, wood waste and wind facilities located across Georgia. Our member EMCs' current portfolio is capable of producing more than 1,540 megawatts of energy - enough to help power more than 265,000 EMC households annually.
