

Emergency alert system power cord

Overview

Emergency Alert System (EAS) is a system that allows the government to disseminate real-time messages to mobile phone users during emergency situations that may extensively endanger lives and property. The system employs cell broadcast service technology to disseminate real-time messages to mobile phones connected to mobile networks.

The EAS, which employs cell broadcast service technology, could disseminate real-time messages to mobile phones connected to mobile networks. A message is classified as either "Emergency Alert" or "Extreme Emergency Alert" according to the severity of the incident concerned.

Emergency Alert System

EAS is a system that allows the government to disseminate real-time messages to mobile phone users during emergency situations that may extensively endanger lives and property. The system employs cell broadcast service technology to disseminate real-time messages to mobile phones connected to mobile networks. In 2011, 11,900 mobile phones were used to disseminate EAS messages.

What is the Emergency Alert System?

The Government today launched the emergency alert system to disseminate important real-time messages to mobile phone users during emergency situations that may extensively endanger lives and property. The system employs cell broadcast service technology to disseminate real-time messages to mobile phones connected to mobile networks.

What is an emergency alert (EAS)?

The EAS, which employs cell broadcast service technology, could disseminate real-time messages to mobile phones connected to mobile networks. A message is classified as either "Emergency Alert" or "Extreme Emergency Alert" according to the severity of the incident concerned.

What is a mobile emergency alert?

The system employs cell broadcast service technology to disseminate real-time messages to mobile phones connected to mobile networks. A message is classified as either "Emergency Alert" or "Extreme Emergency Alert" according to the incident's severity.

How do I know if an EAS message is urgent?

Notification will also pop up on the screen. There are two alert levels for EAS

messages, namely "Extreme Emergency Alert" and "Emergency Alert". Government Bureau or Department that disseminates the EAS message will designate the alert level according to the urgency or severity of the circumstances in question.

What is the national emergency message?

The National Emergency Message (formerly known as the Emergency Action Notification) is the notice to broadcasters that the president of the United States or their designee will deliver a message over the EAS via the PEP system. [5].

Why do government departments send emergency messages?

During emergency situations, such as extreme weather that causes extensive infrastructure damage, major public safety incidents or large-scale public health emergency situations, etc, government departments may disseminate messages using the system to remind members of the public to take contingency measures immediately.
