

Energy plans with solar

Overview

What is a solar-specific electricity plan?

These plans are available to all customers in the market and generally offer cheaper electricity rates with a lower FiT, typically between three cents per kilowatt hour (c/kWh) and 8c/kWh. A solar-specific electricity plan however, is an energy retailer's dedicated plan or offer, designed for solar customers only.

Do you need a solar energy plan?

If you can rely on your solar panels for the whole day: You want a solar energy plan with a good electricity usage and supply rate. This is because you'll still be relying on the grid for electricity in the evenings when your solar panels are inactive.

Why do I need a solar electricity plan?

A good solar electricity plan will help you maximise the return on your solar investment. Find the right deal for you at Canstar Blue.

How do I choose a solar energy plan?

If you have solar panels with battery storage: You'll probably want a solar energy plan with a reasonable FiT and competitive energy rates. In this instance, your energy plan should be price-effective for when your storage system runs dry, or runs in excess of what it can handle.

Should I buy a solar energy plan?

If your solar panels help with only some of your daytime power usage: You'll may want a solar energy plan with low electricity usage rates. This is because you'll still be heavily relaying on the grid to meet your energy usage requirements.

How do I get the best value from my solar?

To get the best value from your solar, compare the different electricity plans and feed-in tariffs available in your area. The best plan depends on all the different rates—fixed and variable charges, as well as feed-in tariffs.
