

Energy storage device of Allison gearbox

Overview

Allison markets its transmissions by vocational series according to the intended use; for example, the Tractor Series is sold for and installed in , while the Motorhome Series is marketed to manufacturers of . A transmission is given a designation specific to the vocational series, but is otherwise identical mechanically to other transmissions sold for other vo.

Who makes Allison transmissions?

Allison Transmission Holdings Inc. is an American manufacturer of commercial duty automatic transmissions and hybrid propulsion systems. Allison products are specified by over 250 vehicle manufacturers and are used in many market sectors, including bus, refuse, fire, construction, distribution, military, and specialty applications.

What is Allison Egen flex & Egen power?

Allison continues to deliver on its promise to provide the most reliable and valued propulsion solutions in the world with the introduction of our eGen™ family of electric hybrids (Allison eGen Flex®) and our fully electric e-Axles (Allison eGen Power®).

When did GM-Allison introduce hybrid bus technology?

GM-Allison introduced hybrid vehicle technology for transit buses in 2003. Allison hybrid transit bus products were initially branded as the Allison Electric Drives EP System, which included the following components:.

What is the Allison Egen power integrated axle?

The Allison eGen Power integrated axle also includes a multi-speed gearbox to optimize both launch and cruising speeds; it was designed to be a drop-in replacement for existing axles for medium- and heavy-duty trucks and buses, allowing more flexibility in battery placement.

Does Allison have an EV solution?

Regardless of where your fleet is on the road to electrification, Allison has an

EV solution to keep you moving forward. Our electric hybrid solutions have already had a positive impact on the planet:.

How much power does an Allison 100D have?

In 2021, Allison expanded the range with the 100S (a single-motor variant of the 100D, with continuous and peak power output of 212 and 324 kW (284 and 434 hp), respectively and a maximum 23,500 N·m (17,300 lbf·ft) of torque) and the 130D (a variant of the 100D with a higher 13 t (29,000 lb) GAWR for the European and Asia Pacific markets).

12.8V6Ah

Nominal voltage (V):12.8
 Nominal capacity (ah):6
 Rated energy (WH):76.8
 Maximum charging voltage (V):14.6
 Maximum charging current (a):6
 Floating charge voltage (V):13.6-13.8
 Maximum continuous discharge current (a):10
 Maximum peak discharge current @10 seconds (a):20
 Maximum load power (W):100
 Discharge cut-off voltage (V):10.8
 Charging temperature (°C):0-+50
 Discharge temperature (°C): -20-+60
 Working humidity: <95% R.H (non condensing)
 Number of cycles (25 °C, 0.5c, 100%doD): >2000
 Cell combination mode: 32700-4s1p
 Terminal specification: T2 (6.3mm)
 Protection grade: IP65
 Overall dimension (mm):90*70*107mm
 Reference weight (kg):0.7
 Certification: un38.3/msds
