

Energy storage outdoor cabinet installation steps diagram

Overview

How to install a cabinet?

To secure correct system operation, cabinet must stand on solid horizontal leveled surface. Because of small space behind and underneath and an easier installation, it is recommended to prepare all cables before putting the cabinet in the position. Position the cabinet with 3-5 cm distance to the wall and vertical plane.

How do I set up an ESS system?

There are a few different ways to set an ESS system up. A combination of these are possible as well: See below drawings to get an idea of all possibilities. The first drawing shows the wiring when a MultiPlus-II is used; and the second one shows how it is wired with a MultiPlus or Quattro.

How do I prevent a solar charger from feeding energy to the grid?

Policy 4: Prevent feeding energy to the grid: There are two options here; first - use ESS, but do not enable Solar charger excess feed-in and it will always be connected to the grid. Or, use the Virtual Switch with ignore AC-Input. Policy 5: Connected to mains, no feedback: Use ESS, select the "Keep batteries charged" mode.

How do I connect EcoStore to the grid?

The EcoSTORE is connected in shunt (parallel) to the grid, so the connection wiring diagram can be identical to the EcoVAR. EcoJoule recommends connection to the mains via 63A fuses and/or isolator or circuit breaker. This is to provide an easy means to isolate the unit.

How do I connect EcoJoule to the mains?

EcoJoule recommends connection to the mains via 63A fuses and/or isolator or circuit breaker. This is to provide an easy means to isolate the unit. The units do have both passive and active anti-islanding protection, so automatically

disconnect from the grid in the case of a power outage (using an internal disconnection switch).
