ENERGY STORAGE SYSTEM

Product Model
HJ-ESS-215A(100KW/215KWh)
HJ-ESS-115A(50KW 115KWh)

Dimensions
1600*1280*2200mm
1600*1200*2000mm

Rated Battery Capacity
215KWH/115KWH

Battery Cooling Method
Air Cooled/Liquid Cooled

Overview

Fortunately, Enkeeo includes an MC4 to DC adapter with both the 155Wh and the 222Wh model. This means that we don't have to buy any adapters to use third-party solar panels. Wh.

Now, let's take a look at some solar panels that are compatible with both Enkeeo models straight out of the box. Each link below will take you to the product page on Amazon. Renog.

Enkeeo doesn't advertise this, but they tell us the max voltages the charge controller can handle, and these are 13V~22V VOC with the 155Wh model, and 13V~25V VOC with the 222Wh.

If we use the numbers above (which might not be 100% correct), the 155Wh would take 6.5 hours to charge from empty to full at full input capacity. The 222Wh would take a little over.

Today I would like to help you figure out how to connect solar panels and which solar panels are compatible with the Enkeeo solar generators. Even though these batteries are often called solar generators, it's a bit misleading since they don't come with solar panels. They do, however, have a built-in solar charge controller so.

Fortunately, Enkeeo includes an MC4 to DC adapter with both the 155Wh and the 222Wh model. This means that we don't have to buy any adapters to use third-party solar panels. What this means is that you can get a panel like the Renogy 50W Eclipse and connect it to.

Enkeeo doesn't advertise this, but they tell us the max voltages the charge controller can handle, and these are 13V~22V VOC with the 155Wh model, and.

Now, let's take a look at some solar panels that are compatible with both Enkeeo models straight out of the box. Each link below will take you to the.

If we use the numbers above (which might not be 100% correct), the 155Wh would take 6.5 hours to charge from empty to full at full input capacity. The 222Wh would take a little over 7 hours when maxing out the input. To max out the 155Wh model, I recommend at least a 40W.
