

Envision Wind Power Generation

SMART GRID & HOME

Overview

Is Envision Energy a leader in overseas wind turbine order intake?

SHANGHAI, Feb. 20, 2024 /PRNewswire/ -- Envision Energy, a global leader in renewable energy, has achieved a remarkable milestone in 2023, securing the leading position in overseas wind turbine order intake among Chinese OEMs.

What is Envision wind turbine?

Envision is not only leading the development of low speed wind turbine in China, but also opening the market for distribute wind power market with innovative and reliable products. By collaborating with Italian famous designer Stefano Giovannoni, Envision focuses on adding the sense of art into the latest series of the smart wind turbine.

How big is Envision Energy's wind turbine order capacity?

This achievement, as reported by the leading energy consultancy Wood Mackenzie, places Envision Energy at the forefront with an order capacity of 4.1 GW, a significant stride ahead of its nearest competitor. Envision Dominates Overseas Wind Turbine Orders Among Chinese OEMs in 2023.

What is Envision's world first Smart wind turbine for low wind speed sites?

Envision's world first smart wind turbine for low wind speed sites has accelerated the strategic realignment of China's wind power industry by effectively tapping low wind speed areas, which accounts for more than 60% of China's wind resource. So far, Envision has the largest market share in low wind speed turbines in China.

How long has Envision been a leader of offshore wind turbines?

As the leader of the offshore wind turbines in China, it has been more than 5 years since Envision's self-developed 4MW wind turbines are produced and operated. Envision has the world's leading integrated design, engineering construction and operation and maintenance capabilities of offshore wind

farms.

Who is Envision Energy?

Envision Energy is the first in the industry to develop "smart turbine" with its exclusive core technology of smart control, advanced measurement method, expert data analysis system, active performance control and reliability-based deterministic turbines.
