

Ergon energy solar power

Overview

Can Ergon Energy get ahead of the solar curve?

UPDATED: Regional Queensland network operator Ergon Energy is taking steps to get ahead of the solar curve, with the roll-out of technology it says will allow more solar power generated on home and business rooftops to be exported to the grid, without disrupting supply.

Does Ergon Energy own a power station?

Ergon Energy also owns and operates 33 stand-alone power stations that provide supply to communities across Queensland which are not connected to the main electricity grid. Since August 2007, Ergon Energy has owned and operated the gas-fired Barcaldine Power Station along with its associated infrastructure, which supplies power to the main grid.

Who is Ergon eco solution?

Ergon Eco Solution provide easy and hassle free solar solutions. I would recommend them to all who are looking to get a solar plant installed for their commercial as well as residential building. They are very professional, customer centric and perfectionist in their job . Installed a solar system at my friend's badminton academy.

Is ergon a good bet for future?

A good bet for future. Why us ?

Ergon is committed to developing customized solar systems for Industrial, Commercial, Institutional and Residential consumers. We have installed over 2000 kWp of solar power projects across India.

What is Ergon Energy's new 'world-class' research & development hub?

Queensland government-owned utility Ergon Energy has opened the doors to a new \$6 million “world-class” research and development hub designed to

accelerate the integration of renewable energy technology including microgrids and standalone power systems into the state's electricity network.

Who is Ergon Energy Network?

Ergon Energy Network is a subsidiary of Energy Queensland Limited, which is itself a Queensland Government -owned company. [2]
