

# **Expected ROI of domestic energy storage project in Tanzania 2026**

## Overview

---

How much investment is needed to meet Tanzania's growing energy demand?

According to the clean energy transition strategy outlined in section 4.1.2, approximately USD 100 billion in investments is required to meet Tanzania's growing energy demand.

How much energy is consumed in Tanzania in 2021?

Especially as population and the economy continue to expand. Despite economic changes due to development, Figure 3 also shows that primary energy consumption in 2021 in Tanzania was still dominated by biomass energy, about 97.67% while the consumption of low-carbon energy such as solar.

How can the government improve supply security in Tanzania?

The government can improve supply security by running large-scale international auctions for procurement of wind power and solar PV. This would be the best way to bring much needed private investment to boost the generation capacity in the Tanzanian power system, and a natural part of the least-cost expansion approach.

How can private-sector participation support Tanzania's Energy Transition & Development Goals?

Create an enabling environment for private-sector participation in the energy sector to mobilize a total of US\$ 4.039 billion in private investments to support Tanzania's energy transition and development goals.

Why is energy consumption increasing in Tanzania?

Energy consumption in Tanzania has increased significantly in recent years, particularly in the eastern and southern regions. According to the International Energy Agency (IEA) World Energy Outlook 2024, accessed on 4 January 2024, "In total, biomass (charcoal and firewood) used in cooking and heating is the dominant energy source in Tanzania's energy system today. The total energy consumption in Tanzania has in-

creased 380% (Figure 3). This increase was driven by the rapid growth of populat.

Is able energy in the electricity mix a problem in Tanzania?

able energy in the electricity mix.In a Tanzanian context, the extensive rural distribu-tion grid that has been established over the past years constitutes a particular concern with regards to

## Expected ROI of domestic energy storage project in Tanzania 2026
