### **Tips for Visiting the Exploratorium with Kids**

Getting Here. The Exploratorium is easy to reach whether you're driving, biking, walking, or taking mass transit. Two adjacent lots offer our visitors discounted parking and we've got plenty of bike racks. Walking from the BART Embarcadero

station or the Ferry Building with little ones? Bring your stroller--it's an easy 15-minute walk--and enjoy the boats, bridge views, and sea birds

### The Iberian Peninsula , The Oxford Handbook of the European Iron Age

The Iberian Peninsula is a territory of some 583,000 km 2 in the far south-west of Europe, linked to the rest of the continent by the Pyrenees mountains. This situation meant it was relatively on the margins of the important historical processes that took place on the European continent and in the Mediterranean lands during the Iron Age.

### **¿Qué es un eclipse solar, solar anular o lunar total?**

La astrónoma del Exploratorium, Isabel Hawkins, señala estos fenómenos solares y a causa del eclipse y explica por qué ocurren. Te presentamos al elenco. Luna. Nuestra Luna es un satélite natural que ayuda a estabilizar nuestro clima y a crear las mareas en nuestros océanos.

### **Iron Age**

The earliest human beings lived during the Stone Age. Stone Age peoples made tools and weapons of stone. Later they learned to make tools and weapons from copper and from bronze, which is a mixture of copper and tin. This time was known as the Bronze Age. The Iron Age started after people learned to remove iron from rock using a very hot fire.

### [How to calculate age on other planets](#)

We came across an interesting site called Exploratorium that can calculate your age and next birthday on all planets. And when we did, we found out that if you are 21 years old on Earth, you would be mere one-year-old on Jupiter and almost 91 years old on Mercury. And by that, we do not mean your body age, but age as in terms of the years
