

Faam energy saving battery

Overview

Who is FAAM - energy saving battery?

FAAM - Energy Saving Battery | 8,448 followers on LinkedIn. On the path to Energetic Transition | FAAM , controlled by Seri Industrial Spa, is specialized in the production and recycling of lead-acid and lithium batteries for traction, industrial, storage and military applications.

Who is FAAM?

FAAM was founded in 1974 in the town of Monterubbiano (FM) as a brand manufacturer of energy storage systems. This historical experience in the sector allows us to offer Made in Italy products with very high energy efficiency.

What makes FAAM unique?

Thanks to the know-how acquired over the years, FAAM began to develop customised solutions with lithium technology complete with its own innovative management system (BMS - Battery Management System) for automotive, traction and stationary applications.

Why did FAAM become part of the Seri group?

In 2013 FAAM became part of the Seri Group, and this was the event that gave new impetus to the company's initiatives. Thanks to group synergies, in fact, it is now possible to enable a strategy of vertical integration of the production value-chain for both lead acid and lithium technology.
