

Farm solar power generation subsidy policy

Overview

Can I apply for a solar Grant and a farm productivity grant?

It is possible to apply for both a solar grant and a farm productivity grant, but separate applications must be submitted, and the maximum grant across both applications is £500,000. Applications should be made through the Rural Payments Agency (RPA). The IFP grant is competitive, with applications judged on how well they meet funding criteria.

What is the improving farm productivity solar grant?

The Improving Farm Productivity solar grant is designed to support the installation of solar equipment on farm roofs and reservoirs. It is part of Defra's drive to improve energy resilience and encourage electrification in agriculture.

How much does the IFP solar grant cover?

The Improving Farm Productivity (IFP) solar grant covers 25% of the capital cost for a wide range of equipment, including: Installation of charging points. PV panels can only be installed on farm building rooftops or irrigation reservoirs; ground-mounted systems are not eligible. How much funding is available?

Grants range from £15,000 to £100,000.

How much is a grant for solar equipment?

For solar equipment, the minimum grant available is £15,000 and the maximum grant available is £100,000. The grant will cover up to 25% of the cost. You can apply for both automated and robotic equipment and solar equipment, however your maximum grant amount still cannot exceed £500,000 in total for both applications together.

Can a contractor apply for a solar PV grant?

Contractors are defined as a business (including a sole trader) that carries out an agricultural or horticultural activity as a service. Contractors are not eligible to apply for solar PV grant funding. The grant funded assets must be located in England. The grant must not be used to subsidise any related business or operations in Northern Ireland.

How much money can I apply for a solar PV grant?

If your application is for robotic or automatic equipment, wavelength specific LED lighting and/or advanced ventilation control units, but does not include solar PV equipment, the minimum grant you can apply for is £25,000 (50% of £50,000). The maximum grant is £500,000 per applicant business.

Farm solar power generation subsidy policy

Uttar Pradesh Solar Energy Policy -2022 (Draft)

6 14. "Government" and "State" mean Government of Uttar Pradesh and the State of Uttar Pradesh respectively; 15. "Gross Metering" means methodology under which the entire ...

Solar Panel Subsidy in Uttar Pradesh, 2024: Rs. 7,800/kW

Solar Panel Subsidy in Uttar Pradesh 2022: Are you planning to install grid connected solar system in your home, office, school, factory, hospital in Lucknow, Kanpur, ...

Solar power in Spain

Spain's solar potential. Spain is one of the first countries to deploy large-scale solar photovoltaics, and is the world leader in concentrated solar power (CSP) production.. In 2022, the cumulative ...

Planning and solar farms

Planning policy for solar farms. Installing solar farms usually requires planning permission. Depending on their size, solar farms will either require planning permission from the local planning authority (LPA) or from the ...

Navigating the Solar Panel Subsidy in Gujarat: Eligibility and Process

Gujarat is leading the charge in solar energy, aiming for a sustainable future. Navigating the solar subsidy application process and solar panel subsidy Gujarat policies is ...

POLICY FOR IMPLEMENTATION OF SOLAR POWER BASED ...

allocation to each Solar Power producer for the grid connected Solar Power Plants sanctioned under JNNSM (Clause 5(a) (iv)) will be as per the guidelines under JNNSM. 7. Eligible Units: ...

Indonesia's energy transition: Dependency, subsidies ...

While the annual subsidies have been at least halved when compared to the final years of Yudhoyono, the whispers and promises of subsidy reform continued without real policy actions. Subsidy reform efforts have ...

Rajasthan Renewable Energy Policy, 2023

cost of establishing additional transmission infrastructure because of generation of power at load centres. Decentralized generation through solar rooftop systems, off-grid applications and ...
