

Flexgen power systems inc

Overview

FlexGen is a technology company. The company is headquartered in , and was founded in 2009. FlexGen is the developer of the FlexGen HybridOS , which is capable of automating the dispatch of energy storage, renewable, and conventional power generation to provide enhanced capability and lower cost.

Where is FlexGen based?

The company is headquartered in Durham, North Carolina and was founded in 2009. FlexGen is the developer of the FlexGen HybridOS energy management system, which is capable of automating the dispatch of energy storage, renewable, and conventional power generation to provide enhanced capability and lower cost of energy.

Who is FlexGen Power Systems?

DURHAM – When FlexGen Power Systems sought to raise capital last year, the Durham-headquartered integrated software and services firm that provides storage solution to private and public power utilities and providers did so following landing a significant client at a time when the company sought to get “bankability.”.

What makes FlexGen the best integrated energy storage system?

FlexGen delivers the best integrated energy storage systems by taking a functionality and software-first approach. We fundamentally turn battery energy storage systems on, deliver advanced functionality through the HybridOS™ energy management system platform, and integrate with the best energy storage hardware systems available.

What does FlexGen stand for?

DURHAM, N.C., July 19, 2022 /PRNewswire/ -- FlexGen Power Systems, Inc. ("FlexGen", or the "Company"), a leading integration services and software technology provider for energy storage solutions in the U.S. and globally, today announced the close of a \$100 million Series C Investment round.

Who uses FlexGen energy storage?

FlexGen originally designed energy storage products for the United States Military, these hybrid power systems were sold to the US Marine Corps, US Army, US Navy SEALs, and the Joint Special Operations Forces-Afghanistan.

What is FlexGen hybridOS?

FlexGen's proprietary energy management software platform, HybridOS, allows energy storage owners to deploy various power market strategies and combine storage solutions with any form of generation.
