

Florida statutes solar energy connection to power company

Overview

First and foremost, Florida law requires that all solar panel systems be connected to the grid. This means that any solar power generated by the system must be fed back into the grid, rather than being stored in batteries for use at a later time. Are solar panels legal in Florida?

Florida law forbids ordinances, deed restrictions, covenants, or similar binding agreements from prohibiting solar equipment use.

Can a homeowner association install solar panels in Florida?

Florida law forbids any entity—including homeowner associations—from prohibiting the installation of solar or other renewable energy devices on Florida buildings. An association may require approval of a system installation, and may establish restrictions for installations.

Does Florida have a solar rights law?

Note: The purpose of this document is to provide general information to the public about Florida's Solar Rights Law and should not be construed as legal advice. Consumers are advised to consult with their attorney for individual guidance.

Do you need a permit to install solar panels in Florida?

The inspection must be completed before the system is connected to the grid, and any necessary repairs or adjustments must be made before the system can be turned on. Another important aspect of Florida's solar laws is the process of obtaining a permit to install a solar panel system.

Does Florida law apply to a solar pool heater?

There has been some litigation with respect to the applicability of Section 163.04. (See Florida Statute Section 163.04 below.) However, most cases have been resolved through mediation. One such case involved the installation of a solar pool heater on the roof of a home.

Can a solar campaign help advance Florida's solar energy policy?

When we launch a campaign you can help the solar industry to advance Florida's solar energy policy forward. Florida law forbids any entity—including homeowner associations—from prohibiting the installation of solar or other renewable energy devices on Florida buildings.
