

Foster wheeler power systems

Overview

The company was focused on (EPC) contracting and equipment supply. It comprised two business groups: a Global Engineering and Construction (E&C) Group and a Global Power Group. The Global E&C Group designed, engineered and constructed leading-edge processing facilities and related infrastructure for the oil and gas, and gas-to-liquids, refining, chemicals.

Who is Foster Wheeler Corporation?

Foster Wheeler Corporation is an international company that handles a wide range of engineering and construction enterprises. The company is organized into four business groups: an engineering and construction group, an energy equipment group, a power systems group, and an industrial and environmental group.

Does wood's Foster Wheeler offer a steam power island?

We can supply complete steam power islands for parabolic trough and tower thermosolar power plants. Although most heat recovery steam generators look similar from the outside, Wood's Foster Wheeler HRSGs have many superior design features that improve reliability, ease of maintenance, and thermal efficiency.

Where is Foster Wheeler located?

"Foster Wheeler AG Lindenstrasse 10 6340 Baar, (Canton of Zug), Switzerland" and "Principal Executive Offices Foster Wheeler AG 80 Rue de Lausanne 1202 Geneva, Switzerland " ^ "Wood Group completes takeover of Amec".

Who is Foster Wheeler Environmental Services?

Foster Wheeler Environmental Services handles hazardous waste management and later became the holding company of the subsidiaries Foster Wheeler Enviresponse, Inc., which offers environmentally related regulatory, technical, design, and remediation services, and Barsotti ' s, Inc., which offers asbestos abatement services.

How did Foster Wheeler benefit from the oil & utility industry?

In the late 1970s and early 1980s, Foster Wheeler benefitted greatly from the boom in oil and utility power industries, achieving excellent profit margins in their contracts. However, the industry ' s heavy overbuilding resulted in a substantial reversal in the 1980s.

When did Foster Wheeler reorganize?

In 1993 the company signed new contracts with China to build two 600-megawatt boilers, and in 1996 it signed a \$200 million contract with the Philippines to build a polyethylene plant. Foster Wheeler reorganized in 1993, incorporating its environmental group into its engineering and construction group.
