

Freiburg solar energy

Overview

The Fraunhofer Institute for Solar Energy Systems ISE (or Fraunhofer ISE) is an institute of the . Located in , the Institute performs applied scientific and engineering for all areas of . Fraunhofer ISE has three external branches in Germany which carry out work on solar cell and semiconductor material development: the Laboratory and Service Center (LSC) in , the Technology Cente.

Is Freiburg a 'solar city'?

Freiburg, Europe's "solar city", has goals of achieving 100% renewable energy by 2035 and carbon neutrality for the city by 2050. In Freiburg (as in the rest of Germany), solar energy has guaranteed feed-in tariffs (thanks to Germany's Electricity Feed-in Law). Freiburg is a shining example of the success of Germany's energiewende.

Is Freiburg a good place to invest in solar energy?

Hans-Martin Henning, a Vauban resident and the director of the Freiburg-based Fraunhofer Institute for Solar Energy Systems, praised the city's commitment and foresight, but added a note of caution. "Freiburg has done a lot of things that do not look spectacular but that were highly effective," he said.

What is the Fraunhofer Institute for Solar Energy Systems ISE?

The Fraunhofer Institute for Solar Energy Systems ISE in Freiburg, Germany is the largest solar research institute in Europe. With a staff of about 1 400, we are committed to promoting a sustainable, economic, secure and socially just energy supply system based on renewable energy sources.

How do hybrid solar panels work in Freiburg?

Hybrid modules on the roof of the city hall in Freiburg generate electricity and heat. An energy consumer becomes an energy supplier: Vertical PV panels are integrated as solar-shading devices into the façade of the City Administration Centre in Freiburg, Germany.

What type of energy does Freiburg use?

In addition to using solar power as a major energy source, Freiburg uses biomass for a significant share of the city's energy needs. The majority of Freiburg consists of woodland, green spaces, and agricultural lands; there are over 5000 hectares of forest surrounding the city.

What happened at the Freiburg Solar Summit?

The Freiburg Solar Summit followed a Solar Heating and Cooling Summit in Freiburg, in which new solar thermal technologies were highlighted. Freiburg, Germany, known globally as Europe's "solar city", installed more solar PV than any other city in Germany, and also more than many European countries.

Freiburg, Germany: Leading the Way as a Solar City

Freiburg, Germany, stands as a shining example of a solar city, showcasing the immense potential of solar energy adoption in sustainable urban development. Through its pioneering initiatives and ambitious solar projects, the city has successfully harnessed the power of the sun to generate clean, renewable electricity while reducing its carbon footprint.
