

Frontier power systems inc

Overview

What is Frontier Power Systems Inc (frontier) doing?

Frontier Power Systems Inc. (Frontier), as a result of an investment of more than \$1.8 million by the Government of Canada and the Province of Prince Edward Island, will continue its work on a new arctic power system based on completely redesigned wind turbines, variable speed diesel generators and an advanced energy storage system.

What is Frontier & how does it work?

Frontier is pioneering a new approach to provide off-the-grid communities with energy security in the form of smart grid technology and a 3-tiered renewable energy system incorporating wind, diesel and an advanced battery storage system.

Can frontier power systems help a northern community?

Prince Edward Island-based Frontier Power Systems' innovation is providing light to some of Canada's most northern communities — regions where access to energy sources has remained almost impossible. The need is real. Many northern communities rely solely on diesel-fueled community generators.

What is Frontier Power Systems doing in Newfoundland?

Frontier Power Systems has been working in renewable energy for decades, including building large-scale wind farms on P.E.I., and is now embarking on a demonstration project in Ramea, a small island off Newfoundland. "Our objective is to reduce the fuel consumption by 50 per cent in this community.

Why is frontier a leader in the village power system market?

"This is an important announcement for us, Frontier engineers have spent the last 15 years developing wind energy technology for economic applications in both utility and remote communities. In that time we have established ourselves as industry leaders in the village power systems market - mainly

isolated grids in remote areas.

How much will frontier invest in Arctic Power?

An investment of nearly \$1.8 million will help Frontier complete the development of a next generation arctic power system that consists of multiple wind turbines, diesel generators, advanced energy storage system and distributed thermal energy storage units.

Frontier power systems inc

Our team

There are so many other important members of the Frontier team Including electricians, wind turbine technicians, engineers-in-training, blade manufacturers, and students. Frontier Power Systems would not exist if it was not for all of them. Our Story Projects

Summerside Wind

As the Project Management and Construction Management firm for this project, Frontier was involved in all aspects of this project, from road construction to turbine commissioning. Before the Summerside Wind Project was built, this small city of 15,000 people was getting much of their electricity from diesel generation.

Our Story

By providing innovative wind turbines we give rural arctic communities the capability and confidence to produce their own power with wind energy. This brings new jobs and the ultimate freedom to community members; sustainability, self-sufficiency and financial freedom are all gained when reliance on diesel generators is eliminated.

GTI International Subsidiaries Merge to Become Frontier Energy, Inc.

On January 1, GTI International, Inc. (GTII) subsidiaries Fisher-Nickel, Inc., Davis Energy Group, Inc., and Bevilacqua-Knight, Inc. (BKI) combined to become a new company, Frontier Energy, Inc. Frontier Energy is a professional services firm delivering energy efficiency, market transformation, and transportation solutions.
