

GCL Integrated Technology Photovoltaic Panel Manufacturer

Overview

Who is GCL system integration technology?

GCL System Integration Technology strives to be the world's leading integrator of comprehensive energy systems.

What does GCL do?

GCL targets at making PV-generated electricity affordable and inclusive for the public by its constant technology innovations in polysilicon, silicon wafers, cells, modules, system integration and photovoltaic power plants, continuous improvement of its management, regional layout and green energy certification systems.

Where is GCL integration building a 12 GW module factory?

GCL Integration has started building a 12 GW module factory in Funing, China's Jiangsu province. The Chinese PV panel maker says it is investing CNY 2 billion (\$290.4 million) in the new facility, which will host 14 production lines. GCL Integration expects to begin manufacturing activities at the new facility in October.

When will GCL integration start manufacturing solar panels?

GCL Integration expects to begin manufacturing activities at the new facility in October. With the new factory, its total solar panel manufacturing capacity will reach 30 GW. The company also announced plans to raise CNY 6 billion through a private placement of shares.

What is a GCL module?

A GCL module is a residential solar power solution from GCL, best suited for homes. The G-Home Solar Kit from GCL includes energy storage and home energy management systems (HEMS), enabling homeowners to store solar energy throughout the night.

Why should I choose a GCL modular system?

GCL's modular system is versatile and best suited for all kinds of applications, including residential use. The G-Home Solar Kit is a perfect power plan for your home that combines energy storage and home energy management systems (HEMS), allowing home owners to store solar energy throughout the night.
