

Generators for home power outage

Overview

What generators do you need for a power outage?

A one-time roofer and a serial remodeler, Dan can often be found keeping house at his restored Brooklyn brownstone, where he lives with his wife and kids. During a power outage, a reliable generator from a leading brand like Generac, Kohler and Craftsman will keep your home running and loved ones safe.

Should you buy a home generator if you have a power outage?

A power outage may leave you literally caught in the dark, but you can still be prepared by buying a home generator now. Here are the best home generators.

How does a generator work in a power outage?

Once a power outage is identified, the generator's engine is automatically activated and fueled by natural gas, propane or diesel stored on site. This engine drives an alternator to produce electricity, which is then converted to the appropriate voltage and frequency for household use.

What should I do if I have a power outage?

The first option is a portable generator. Portable generators are easy to find in your local hardware store, run on gasoline, and have to be moved outside and manually started during a power outage. Portable generators can provide immediate relief during lengthy or frequent outages and can be purchased for a few hundred dollars.

What type of generator do I Need?

A standby generator, like the Generac Guardian 24kW Home Generator, is the most common option for whole-home generators since it offers average power outputs ranging from 10,000 to 24,000 watts. This generator type is permanently installed outside the home and is connected to a propane fuel

tank or natural gas line.

Can a generator power a whole house?

Large whole-house generators can power an entire average home, while smaller units provide power for key appliances. These are the best standby models from CR's tests.
