### **Georgia commission fails to expand solar net metering program**

A net metering policy was spelled out in Georgia Power's 2019 rate case, enabling Georgia Public Service Commission to offer net metering with monthly netting to 5,000 rooftop solar customers or 32 MW of capacity, whichever comes first. Georgia allows for net

### **What Are Solar Buyback Plans and Net Metering Plans?**

A solar buyback plan is an agreement with your electricity provider to sell your excess solar power back to the grid. Solar buyback programs usually pay you a different kWh rate for your consumption versus your surplus generation, and the consumption rate is normally higher; alternatively, net metering programs may pay you full value for your excess power.

### **How it Works**

How Solar Energy Works Solar panels are typically mounted on the rooftop but can also be ground mounted. The panels harness energy from the sun and converts it into usable power in your home. If your system produces more power than you can use at any given

### Georgia Power objections cast long shadow over state lawmakers

A push to expand community solar in Georgia is running into opposition from the state's largest electric utility, which has been under pressure in recent years to increase rooftop solar. Proposals filed in both chambers have sparked interest at the committee level, with those talks set to continue this week. But a key deadline for [...]
