

Overview

What are giant energypak battery systems?

Giant's latest EnergyPak battery systems feature streamlined designs that are integrated with the E-bike for a sleek and modern profile. There are two levels of EnergyPak—the EnergyPak Smart and EnergyPak. We also offer EnergyPak Plus, a range extender that helps prevent you from running out of power before reaching your destination.

What is the Giant EnergyPak Smart Compact battery?

The Giant EnergyPak Smart Compact battery is a compact version of the EnergyPak series, offering 500 Wh. It features a smart side release battery that can be removed and inserted from the side.

Is giant energypak a good battery charger?

The EnergyPak Smart Compact has been upgraded to a more powerful 500Wh. This will boost your range while maintaining the clean integration and looks. Giant's EnergyPak is well-built for carrier and side release mounting and comes with an advanced 4A charger with BMS system, so the battery can be charged quickly and efficiently.

What is the giant energypak side release 500 watt battery suitable for?

The Giant EnergyPak Side Release 500 Wh battery is suitable for all Giant E-Bike models like Fathom, Explore or Liv Vall. The battery serves as a spare, additional or replacement battery. The Giant EnergyPak Side Release Battery has a power of 500 Wh with 36 volts and is charged via the 3 pin charging socket.

How much power does a giant energypak have?

With 500 Wh, the Giant battery has plenty of power for a full day on your e-bike. The frame battery is mounted on the corresponding mounts on the down tube of your e-bike. This ensures a pleasantly low center of gravity and easy

handling. The Giant EnergyPak also contains modern lithium-ion cells that function without memory effect.

What is a giant energypak plus 200 battery?

With the Giant EnergyPak Plus 200 additional battery, your e-bike can go the extra mile. Expand your range in no time at all or use the extra power for a few more laps on the trail. The super compact EnergyPak battery with 200 Wh is inconspicuously mounted on the bottle cage of your electric bike.

Giant energypak 500 lithium-ion battery

EnergyPak Chargers , Giant Bicycles Official site

It takes 2.2 hours to charge 80 percent with an EnergyPak Smart 625. The Smart charger also helps extend battery life. When the EnergyPak is charged more than 500 cycles, this charger uses a lower voltage, so the cells are used in a less energetic way
