

Global ranking of photovoltaic tracking bracket stocks

Overview

What is the global PV tracker market share?

The US accounted for the majority of the global market, with three US-based manufacturers, Nextracker, Array Technologies and GameChange Solar, ranking as the three largest shippers in the world. Global PV tracker shipments grew by 28% in 2023 to 92 GWdc, according to Wood Mackenzie 's Global solar PV tracker market share' report 2024.

What is the global solar tracker market size?

The global solar tracker market size was valued at USD 7.88 billion in 2023 and is projected to grow from USD 8.67 billion in 2024 to USD 25.24 billion by 2032, exhibiting a CAGR of 14.3% during the forecast period.

Are solar trackers the future of PV technology?

The use of solar trackers on PV modules requires less design regulations when compared to mirrors, lenses, and Fresnel collectors on the CSP and CPV technology trackers. These features will drive the growth of solar trackers in PV technology over the forecast period.

What percentage of PV trackers are sold in the US?

Together, the three companies accounted for more than 50% of global tracker shipments and 90% of the US market. The US is the world's largest individual market for PV trackers. It experienced 10% year-on-year growth last year, to over 37 GWdc of shipments.

How is the solar tracker market segmented?

The solar tracker market is segmented by Axis Type and Geography. By axis type, the market is segmented into Single Axis and Dual Axis. The report also covers the market size and forecasts for the market across major regions The report offers the market size and forecasts for solar trackers in revenue (USD) for all the above segments.

Which countries are leading the solar tracker market?

Countries such as China, the United States, Japan, Germany, India, and Australia account for most of the installed PV capacity globally, which is expected to play a significant role in the solar tracker market. The Chinese market grew with 216 GW of newly installed PV capacity in 2023, representing more than 55.26% of the global market.
