

# **Global renewable energy consumption**

## Global renewable energy consumption

---

### Renewables - Global Energy Review 2020 - Analysis

The use of renewable energy in the form of biofuels declined in Q1 2020 as consumption of blended fuels for road transport fell. The share of renewables in global electricity generation jumped to nearly 28% in Q1 2020 from 26% in Q1 2019. The increase in

### Executive summary - Renewables 2022 - Analysis

The first truly global energy crisis, triggered by Russia's invasion of Ukraine, has sparked unprecedented momentum for renewables. Modern renewable consumption for heating purposes is expected to increase by almost one-third during 2022-2027, raising

### Historical characteristics and projection of global renewable energy

6 ???· Projection of global renewable energy consumption among 39 represented counties from 2020 to 2030. The shaded blue area is the historical REC trend from 1990 to 2020. ELM, GRNN and MLP denote the extreme learning machine model (red line), general and

### [Renewable Energy Statistics 2022](#)

Download Renewable energy highlights The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable Energy Statistics 2022 provides datasets on power-generation capacity for

2012-2021, actual power generation for 2012-2020 and renewable energy ...

### Energy

Carbon intensity of electricity generation  
Electricity production by source Absolute area chart  
Electricity production from fossil fuels, nuclear and renewables  
Energy use per person  
Global primary energy consumption by source  
Stacked area ...

### Executive summary - Renewables 2024 - Analysis

Renewable electricity use in the transport, industry and buildings sectors accounts for more than three-quarters of the overall rise in forecasted global renewable energy demand. This increase ...

### Global Renewables Outlook: Energy transformation 2050

The Global Renewables Outlook shows the path to create a sustainable future energy system. This flagship report highlights climate-safe investment options until 2050, the policy framework needed for the transition and the challenges ...

## Global Renewables Outlook: Energy Transformation 2050 Summary

Chapter 2 highlights the global socio-economic implications of the energy transformation using the indicators GDP, employment and welfare. Chapter 3 outlines regional techno-economic ...

### Global renewable energy consumption by country 2023 , Statista

In 2023, renewable energy consumption in China reached 27.6 exajoules, more than any other country in the world. Premium Statistic Historical renewable energy consumption APAC 1980-2023

### [Renewable energy consumption](#)

Measured in terawatt-hours of direct primary energy consumption. Traditional biomass refers to the consumption of fuelwood, forestry products, animal and agricultural wastes. Licenses: All visualizations, data, and articles produced by Our World in Data are open

### [Renewable energy statistics 2024](#)

The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable energy statistics 2024 provides datasets on power-generation capacity for 2014-2023, actual power generation for 2014-2022 and renewable energy balances for over 150 countries and areas for 2021-2022.

### Renewable energy consumption

Wind energy generation by region. Wind energy generation vs. installed capacity. Wind power generation. Measured in terawatt-hours of direct primary energy consumption. Traditional biomass refers to the consumption of fuelwood, ...

### World Energy Transitions Outlook 2022

Note: The particulars of recent year for the indicators are [1]Share of renewables in electricity generation (2019), [2]Addition of renewable energy technologies (2020), [3]Annual solar PV additions (2020), [4]Annual wind energy additions (2020), [5]Investment needs for RE generation (2019), [6]Share of renewables in final energy consumption (2019), [7]Solar thermal collector ...

### World Energy Transitions Outlook 2023

The share of renewable energy in the global energy mix would increase from 16% in 2020 to 77% by 2050 in IRENA's 1.5 C scenario. as shown in Figure 2.10. With respect to key markets, China accounted for over 41% of the global energy consumption in (8

### Electricity - Renewables 2023 - Analysis

Renewable electricity capacity additions reached an estimated 507 GW in 2023, almost 50% higher than in 2022, with continuous policy support in more than 130 countries spurring a significant change in the global growth trend. This worldwide acceleration in 2023

### Global increase in renewable energy consumption by source and ...

Global increase in renewable energy consumption by source and sector, 2020-2025 - Chart and data by the International Energy Agency. About News Events Programmes Help centre Skip navigation Energy system

### Historical characteristics and projection of global renewable ...

6 ???· Projection of global renewable energy consumption among 39 represented counties from 2020 to 2030. The shaded blue area is the historical REC trend from 1990 to 2020. ELM, ...

### Renewable energy share in the total final energy consumption

The renewable energy share in total final consumption is the percentage of final consumption of energy that is derived from renewable resources. TARGET 7.2 By 2030, increase substantially the share of renewable energy in the global energy mix

### Renewables

The electricity sector remains the brightest spot for renewables with the strong growth of solar photovoltaics and wind in recent years, building on the already significant contribution of hydropower. But electricity accounts for only a fifth of ...

### Historical characteristics and projection of global renewable energy

6 ??? Trends of global renewable energy consumption Global REC has experienced rapid growth over the past three decades, particularly after entering the 21st century. In 2020, the total REC of sample countries reaches 6619.25 TWh, which is much more than 1990

### [Renewable energy statistics 2024](#)

The International Renewable Energy Agency (IRENA) produces comprehensive, reliable datasets on renewable energy capacity and use worldwide. Renewable energy statistics 2024 provides datasets on power-generation capacity for ...

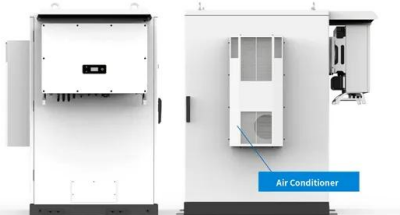

### Executive summary - World Energy Outlook 2023

Some of the immediate pressures from the global energy crisis have eased, but energy markets, geopolitics, and the global economy are unsettled and the risk of further disruption is ever present. Fossil fuel prices are down from their 2022 peaks, but markets are tense and volatile.

### [Energy Production and Consumption](#)

Global energy consumption continues to grow, but it does seem to be slowing -- averaging around 1% to 2% per year. Primary energy consumption. Total energy consumption. How ...

### Global direct primary energy consumption

Energy consumption is measured in terawatt-hours, in terms of direct primary energy. This means that fossil fuels include the energy lost due to inefficiencies in energy production. Licenses: All visualizations, data, and articles produced by Our World in Data are

### **A comprehensive review of international renewable energy growth**

The situation of global energy consumption in terms of fossil energy (coal, oil, and natural gas), nuclear energy, and renewable energy has experienced notable changes since 2015. It is important to note that the growth rates and specific energy mix can vary from country to country due to factors such as available resources, infrastructure, policy frameworks, and ...

### **Global renewable energy trade network: patterns and ...**

The renewable energy product trade is critically important to global economic prospects and its rapid development, making it a key issue in international economics of much interest to scholars. Previous studies have paid attention to bilateral trade, yet we still know little about the patterns of renewable energy product trade and its evolution from the whole industry ...

### **Share of electricity production from renewables, 2023**

Renewables include electricity production from hydropower, solar, wind, biomass & waste, geothermal, wave, and tidal sources. (EI) provides primary energy (not just electricity) consumption data and it provides a longer time-

series (dating back to 1965) than

### Renewable energy: Global capacity increased by 50% in 2023

The world added 50% more renewable capacity in 2023 compared to the previous year. The COP28 climate talks called for a tripling of renewable energy capacity and doubling energy efficiency improvements by 2030. Following COP28's calls to triple renewable

### Share of primary energy consumption from renewable sources

Energy Institute - Statistical Review of World Energy (2024) - with major processing by Our World in Data. "Share of primary energy consumption that comes from renewables - Using the substitution method" [dataset]. Energy Institute, "Statistical Review of

### Massive global growth of renewables to 2030 is set to match ...

Overall, led by the massive growth of renewable electricity, the share of renewables in final energy consumption is forecast to increase to nearly 20% by 2030, up from 13% in 2023. Meanwhile, renewable fuels - the subject of a special chapter in the report - are lagging behind, underscoring the need for dedicated policy support to decarbonise sectors that ...

## Global energy consumption

Premium Statistic Global renewable energy consumption 2000-2023 Fuels breakdown  
Premium Statistic Distribution of final energy consumption globally 2022, by fuel source  
Distribution of final

## Renewable Energy

Renewable Supply and Demand Renewable energy is the fastest-growing energy source globally and in the United States. Globally: About 11.2 percent of the energy consumed globally for heating, power, and transportation came from modern renewables in 2019 (i.e., biomass, geothermal, solar, hydro, wind, and biofuels), up from 8.7 percent a decade prior (see figure ...
